GOVERNANCE PLAN ANALYSIS PIPELINE

ENPADASI had planned to develop pipelines for analysis of data. However, during the execution of the project, it was concluded that a lot of work already was done in other projects. For this reason WP4 delivered a mapping of the current tools. This information will be broadly shared and integrated in research infrastructures (RI) as ELIXIR and the RI Food Nutrition and Health that is currently under development. Thereby they will be shared in a large audience. Some of the described tools may require usage of heavy servers as they are computationally large tasks. The ENPADASI partners can be contacted via the google mailing-list that is published on the website for contact details on server capacity.

In WP3 analysis tools were implemented in the DASH-IN infrastructure the maintenance of this part is described in deliverable 1.2.1.

As ENPADASI did not deliver a new analysis pipeline as such, no maintenance costs are connected to this part.
