INTRODUCTION

ENPADASI aims to develop a database (WP3) based on the reuse of data obtained from different nutritional & clinical studies in Europe. However, the sharing of raw, meta or aggregated data raises several regulatory questions. Therefore, the scope of the WP5 is to define general rules required to share and reuse data in accordance with legal and ethical aspects of the EU participating countries and with respect to national policies. Four different topics are concerned in the WP5: ethics, data protection, data sharing policies and intellectual property.

As all the other deliverables in this work package already described the specific details on data sharing policies, this deliverable shows the relation between those deliverables. The link with the other work of ENPADASI is shown in deliverable 2.5.1. 'Guidelines for nutritional data sharing'.
